

Biocide AY-10

DESCRIPTION:

This is a stabilized bactericide. This water-soluble liquid preservative effectively controls bacteria, yeasts, moulds, and algae in adhesives, putties, and sealants. Biocide AY-10 provides increased stability and sanitation speed. Suitable for use in aqueous products with pH ranges of 3-9.

APPLICATIONS

When compared to traditional isothiazolinone bactericides, this product outperforms them. Biocide AY-10 improves sanitation efficiency and resilience against microorganisms. Biocide AY-10 outperforms traditional CMIT/MIT solutions in difficult environments, retaining more sanitising potency.

In certain markets and applications, low quantities of methyl isothiazolinone chlorine (15-30 ppm) are preferred. Biocide AY-10 is ideal for these uses.

DANGER

Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, skin or clothing. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. This product may cause skin sensitization reactions in some people. Do not breathe vapor or spray mist.

ACTIVE INGREDIENT:

5-Chloro-2-Methyl-4-isothiazolin-3-one

2-Methyl-4-isothiazolin-3-one
